

KANNON

16 Years Old

Diagnosed with Ewing's Sarcoma
in April 2018 at Age 15

My name is Kannon. This past April I told my parent's I had a lump on my leg, after a Volleyball game I was unable to walk, my mom took me to the ER, they explained to me I would need surgery. Had surgery, then a week later we were all told the news...I have Ewing's Sarcoma. Something I thought was an infected "pimple" has changed my entire world. As now I have "Cancer". Thrust into the world of medicine, full of tests and being poked and prodded, pulled from sports, school and the life I knew...

Along my journey I have met some of the most AMAZING people. I've had my ups and downs but with the support of my family, friends and everyone we've met along the way I see the light at the end of the tunnel. I have a few more months of treatment then I am hoping to return to sports (Football, Soccer, Volleyball) and school. All the organizations that have helped me so far along my journey I can't thank enough. I'm so excited to be part of the "CHAMP" team and all they do for the kids.

Our Family motto is "Failing isn't an option!" **#KannonFierce** **#NoOneFightsAlone**
