

KYLAH

4 Years Old

Diagnosed with Acute Lymphoblastic Leukemia (ALL) in April 2018 at Age 3

Kylah had been having fevers and complaining of hip & back pain off & on for about 2 months. Between March & April, we took 2 trips to the ER where we were sent home without certain answers. The 3rd time we took her in to the ER I demanded that her blood be drawn because I just knew there was something very wrong with her. The next day we were informed that Kylah had all the markers for Leukemia. Our entire world was flipped upside down. We'll never forget Kylah's first nurse, Emily, who continually reminded us that ALL is treatable and curable. We held onto those words as well as our faith in God to get us through. We learned to lean on our family and close friends for support. We received an abundance of prayer from all over the world. On May 8, 2018 we heard that Kylah is in remission!!!!

Kylah's treatment will be 2 1/2 years, it's going to be a long road but Kylah is Strong. She has more good days than bad and that in itself is a blessing. We are immensely thankful for all of the staff at Cardon Children's Medical Center, they are truly amazing. We have also been overwhelmed with support from all of the different pediatric cancer foundations throughout the valley. It's great to know that we are not alone.

Although Kylah doesn't exactly know what is going on she still wakes up every morning with a smile on her face and a fight in her heart!

She is our HERO!

Think about all the smiling faces you have helped while you run or walk!
