

# AIRICK

7 Years Old

Diagnosed with Statge 4  
Glioblastoma at age 4

Airick is more than a conqueror. He is my hero. Diagnosed at 4 with Glioblastoma, our family is happy to say he is 3 years cancer free and ready to take on the world. He is special and wishes to help other sick children get through this sickness. He loves to ride his dirt bike, go swimming with his friends, and loves Mexico.

3 year Cancer survivor

Think about all the smiling faces you have helped while you run or walk!
