

ANDREA

4 Years Old

Diagnosed with
Rhabdomyosarcoma at age 2

Andrea was diagnosed with rhabdomyosarcoma in her bladder when she was only 2 years old. It changed our family and changed our way of seeing life.

Her chemotherapy treatment lasted a little over a year and included 7 weeks of radiation. Throughout her chemotherapy she had energy to play and say “I’m not sick”.

Andrea’s dream to go to Disney World was granted through Make A Wish. She met Minnie Mouse and the princesses. She had a wonderful time even if she felt a little tired. Andrea enjoyed staying at Give Kids the World because all the children had Cancer like her and she felt very loved by everyone.

Andrea enjoys playing with Play-Doh, coloring books, playing with dolls and playing in the playhouse with Minnie Mouse. She loves spending time in the pool and going to the park.

Think about all the smiling faces you have helped while you run or walk!
