

COLBY

4 Years Old

Born 4 Months Premature Diagnosed with
AFP (Alpha-Fetoprotein) Hepatoblastoma
at 23 months old
2 Years Cancer Free and Counting!

With Colby and the cancer diagnosis, nothing stops us. Not only is Colby a Cancer Survivor she is also a Micro-Preemie, born at 23 weeks gestation. Colby has known only to fight and keep fighting since the day she was born. Colby's fight for life has affected our family in so many ways - too many to list.

- Value life as it truly can be taken in a moment.
- Value time with your loved ones and the precious moments you have with them is a top priority.
- There isn't anything life can throw at me that can cause my life any stress - our lives are too short and precious to stress over anything.
- Smile, there is always something worth smiling about.

Colby loves her dogs, Disney movies, her friends, the water, and finally getting to go outside!
She is an outside kind of girl!

Colby, my fighter, is home - I have nothing to stress over and everything in the world to smile about.

Think about all the smiling faces you have helped while you run or walk!
