

DYLAN

8 Years Old

Diagnosed with Rhabdomyosarcoma
May 25, 2018

Dylan is a smart and incredibly sweet 8-year-old boy. He is also autistic and non-verbal. He was diagnosed with Rhabdomyosarcoma on May 25, 2018. Despite his difficulty communicating with others, he is pushing through his treatment like a true warrior.

Our family is so proud of him and incredibly grateful to all of the medical professionals who are caring for him with great patience and love.

Think about all the smiling faces you have helped while you run or walk!
