

JAICZIELLE

5 YEARS OLD

B-Cell A.L.L. at age 3 1/2

Jaiczielle or as everyone calls him Jaicz Jaicz was diagnosed 12/18/2019 at the age of 3 and a half years old.

When he was first diagnosed, he had a very hard time. He would be home only for 2-day intervals, would catch fevers, and then be readmitted for 7 to 14 days at a time. On one occasion, Jaicz caught a bacterial infection that doctors said if he would have not been in the hospital that day at the onset of fever, he would not be here today. Jaicz Jaicz has matured so fast not by choice but by circumstance. He fights and is so brave. Now at 5 years old he has adapted to his medical care being part of his life.

He loves to create things with his hands. He is a huge Lego lover. Super Mario and Batman and Joker are his favorite. He loves to draw and play tag zombies with his dad. Give him any building object and he can make you some pretty cool things! He is full of life, happy with a giggle and smile that is contagious. When asked what he wants to be when he grows up, he replied "I want to be strong! So, I can lift heavy things!"

Little does he understand that his amazing strength is what made us strong and lifted us from our knees on the darkest days. He is a warrior, our hero! We are strong because we are Jaicz Jaicz strong.

Think about all the smiling faces you have helped while you run or walk!

SEBASTIAN

**FOREVER
2 YEARS OLD**
AML (RAM Phenotype)

Sebastian was our beautiful healthy baby boy; he was diagnosed with AML at only 19 months old.

When you hear the words “your child has cancer” you feel as if you have no control over your life or your child’s, you feel as if you failed in life. These are the worst words you can hear.

Sebastian fought this horrible disease for almost 11 months, he had 3 rounds of chemotherapy and a bone marrow transplant. Unfortunately, nothing worked, and he gained his angel wings 11/3/2017. We keep his memory alive through everything we do.

One good thing that came out of the diagnoses was we got closer to God
Cancer changed our life completely. We see life differently.
