

JUSTIN

10 Years Old

Diagnosed with Osteosarcoma
at 9 years of age

Justin was diagnosed in August 2018 and began treatment in September. He completed his treatment in May 2019. Justin's family and friends have stuck by him, he maintained his beautiful smile throughout the whole year.

All the lovely people he was so blessed to meet keep his spirits up and his love for art and music helped him see the bright side of the day.

Think about all the smiling faces you have helped while you run or walk!
